Thanks so much. Manchester is a community on southeast side of Houston that is completely surrounded by Valero's refinery. Talking about compatible use, there are houses still standing between industrial tanks.

So they will likely talk about the EPA's new refinery rules and why we need them strong, especially in Texas. This was also where they wanted our members from Pasadena to speak to similar issues and members around CES and other like sites in Houston to speak to that experience as well.

I'll let them know to make that change on the agenda. Thanks for catching it.

Best,

It was great seeing you last night as well. By the way, what is Manchester and what type of issues are the residents having at that location?

On another note and not a huge deal. The agenda say EPA Director. It should be EPA Administrator.

Have a great weekend.

Gary,

Great to see you last night at our forum. Below is the proposed agenda for next Thursday's schedule with Ms. McCarthy.

We're definitely going to be involved and also talk about CES and all your work to help get it back to a compatible use for the neighborhood!

Talk soon,

Tiffany Hogue

I assume you're in this loop? And I asked Nancy to make sure she forwarded this to you as well.
